Introduction

The American Marketing Association defines marketing as “the process of planning and executing the conception, pricing, promotion, and distribution of ideas, goods, and services to create exchanges that satisfy individual and organizational objectives.”

Marketing involves, but is not limited to, such diverse activities as selling, marketing-information management, advertising, product design, distribution, pricing, purchasing, and financing. It is performed in profit and nonprofit businesses, organizations, and agencies of all types and sizes. Marketing is, therefore, a multi-faceted, critical business function that is interwoven with such social sciences as economics, psychology, and sociology. Its successful performance depends on the application of mathematics and communication skills and the use of critical thinking and problem solving.

Marketing is characterized as dynamic and changing. However, the pace at which marketing is changing has accelerated due to environmental shifts taking place in the business world: downsizing, outsourcing, mergers, international competition, world markets, and technological innovations.

CTE: Marketing, Management, and Entrepreneurship is a distinct discipline that integrates concepts and applications throughout the curriculum.

- Academic Concepts: The study of marketing incorporates academic understanding, including mathematics, reading, writing, speaking, sociology, psychology, and geography.
- Technology Applications: The successful implementation of marketing activities requires the ability to evaluate, select, and apply technology tools and resources.

Marketing employment opportunities are quite diverse and are integrated in all industries. They include a variety of marketing functions at various occupational levels. The levels of responsibility range from entry-level positions through business owner. Individuals employed in marketing positions may specialize in one or more of the marketing functions (i.e., distribution, financing, marketing-information management, pricing, promotion, product/service management, and selling), or they may require a broad understanding of all marketing functions as would be needed by a business owner or manager.

In today's society, individuals face a competitive environment that demands creative, innovative solutions to new problems and new opportunities. Students must be prepared to understand the demands of others, analyze the fast-changing environment, and formulate responsive, rational, and proactive approaches to decision making.

DECA (An Association of Marketing Students) is a co-curricular, international career and technical youth organization with emphasis on developing civic consciousness, leadership skills, social intelligence, and vocational understanding within the student members. DECA offers a comprehensive program of competitive events that contribute to the development of skills necessary for careers in marketing, merchandising, management, and entrepreneurship. The DECA Competency-Based Competitive Events Program facilitates effective integration of DECA as an integral component of the total marketing education instructional program. Events are designed to enable students to engage in activities that will extend their interests and skills for careers in marketing and to measure, via performance indicators, the degree to which skills have already been acquired.

DECA (An Association of Marketing Students) is the co-curricular career and technical student organization associated with all CTE Marketing Programs and integrates its programs and services into the marketing classroom.
